SIZE

60,000 sq. ft.

TIMELINE

July 2010 - May 2010

PROJECT HIGHLIGHTS, FEATURES & BENEFITS

The Montgomery County Correctional Facility (MCCF) in Pennsylvania needed a quick solution for their increasing inmate population for Work Release and DUI programs. In the planning stages for almost two years, MCCF decided the best solution was MODLOGIQ'S permanent modular construction.

This 512-bed dormitory facility incorporates four (4) two-story modular dormitory wings interconnected by a site-built core building which contains ramps and stairs—allowing access to each of the other wings.

Access to the existing Administration Building will be provided via a modular connector link—approximately 268 feet long with a sloped floor and elevation change in eight-feet.
